ABSTRACT

Results of a 1981-1982 survey of foreign students in the United States are presented. The survey, which accompanied the Annual Census of Foreign Students in the United States, studied country of origin, field of study, academic level, and sex of foreign students. Of the 2,454 institutions that reported foreign students, 1,845 or 75.2 percent provided additional data, reporting on 197,089 individual students. Data on the distribution of students among world regions indicate that in 1981-1982, 32.5 percent were from South and East Asia, followed by the Middle East (22.8 percent) and Latin America (17 percent). Engineering and engineering technologies were chosen by 23.1 percent of the students, while business and management were chosen by 17.9 percent. The data indicate significant differences in choice of field by students from different world regions. In 1981-1982, 49.5 percent of all foreign students were enrolled in bachelor's degree programs, while 35.2 percent were in graduate degree programs and 10.6 percent were in associate degree programs. The overall ratio by sex was 71.5 percent men to 28.5 percent women. Foreign student gender differences by country were also assessed. Appended materials include a comparison of numbers of students found by the additional survey and the Annual Census, data on foreign student enrollment by institution, country codes and field-of-study codes, and the questionnaire. Guidelines for the Release of Census Data

Reports based on census data are available to individuals, agencies or corporations for clearly identified purposes of scholarly research, public information or recruitment for employment.

Reports will be produced for recruitment purposes only when the employer has indicated that: the openings are for employment in the students' home countries or, in some instances, home regions; students' obligations to the sponsors of their U.S. study and/or to their own governments will be respected; the corporation or agency does not engage in discriminatory practices.

Student names obtained as a by-product of the census activity will not be released in any case without the student's prior consent.

The Institute of International Education reserves the right to request that the proposed use of the data be documented and to withhold census data when the request is not deemed to be for appropriate scholarly, public information or recruitment purposes.

The Institute of International Education (IIE) was founded over half a century ago to promote peace and understanding through educational and cultural exchanges. At present it is the largest not-for-profit organization in this field.

Among the services made possible through contributions are free information and counseling, student hospitality programs, a research and reference library, conference/seminars, an overseas application information service, and publications relating to the field of international education. Contributions to the Institute are tax-deductible.

The Institute fulfills its mission through its services to sponsors—foundations, corporations, governmental agencies, and international organizations—and through its services to educational institutions and the general public. Services to its

sponsors are self-supporting; services to educational institutions and the general public are made possible through contributions from individuals, foundations, and corporations.

The IIE publication, *Open Doors: 1981/82**, was used in the production of some sections of *Profiles* and can be purchased from the Communications Division, IIE, for \$22.95 (includes first-class postage and handling).

The Statistical Research Division (SRD) of the Institute conducted the Annual Survey of Foreign Students with the guidance of the Interassociational Committee on Data Collection (ICDC). The SRD can produce special reports from the data base for scholars and others interested in international educational exchange. For further information and charges contact the manager, Statistical Research Division, IIE.

DEFINITIONS

Foreign Student

A foreign student has been defined as anyone who is enrolled in courses in the United States who is not a citizen or an immigrant (permanent resident). Refugees are included.

Higher Education

In respect to the United States, "Higher Education" is used to describe the group of colleges and universities listed in the *Education Directory, Colleges and Universities—1981/82*. Printed by the U.S. Government Printing Office, it is National Center for Education Statistics document No. 82-306.

Fields of Study

The fields of study used in this document are those from *A Classification of Instructional Programs*, also published by the NCES. See **Appendix 4** for the list of fields.

Regions

The countries and territories included under each major region are listed in **Appendix 5**.

ACKNOWLEDGEMENTS

To the thousands of men and women of the National Association for Foreign Student Affairs (NAFSA) and the American Association of Collegiate Registrars and Admissions Officers (AACRAO), who spent many hours in addition to their usual work on the Annual Census to provide the extra detailed level of data needed to produce this book;

to the Bureau of Educational and Cultural Affairs of the United States Information Agency, and in particular Mary Ann Spreckelmeyer, former Chief, and Joseph B. Bruns, Chief, Student Support Services, whose guidance and support made the STEP 3 data collection and this edition of *Profiles* possible;

to Leo Goldstone of the U.N. Statistical Office and former Chief of the Division of Statistics on Education, Office of Statistics of Unesco, who assisted in the design of the STEP 3 survey and served as a consultant to this book;

to Yoram Gelman, computer consultant to IIE, who with the cooperation of IIE's data processing staff designed and implemented the complex programs needed to utilize the vast amount of data on which this book is based;

to James I. Bauer for assistance in the preparation of tables and text for this book;

to Kenneth Bogard and Leo J. Sweeney, past and present presidents of AACRAO; Wallace B. Edgerton and Richard M. Krasno, past and present presidents of IIE; and Barbara B. Burn and Robert B. Kaplan, past and present presidents of NAFSA, for their support and encouragement;

to these and the many other people who assisted in the preparation of this book we express our gratitude.

INTRODUCTION

This edition of *Profiles: The Foreign Student in the United States* contains the results of a biennial survey of regionally accredited institutions of higher education that requests individual data on foreign students. This edition, based on data from the academic year 1981/82, is the second in a series that will report the results of research on specific aspects of international educational exchange. It is part of a continuing effort by the Institute's Department of Program Development and Research to provide a better basis for objective assessments of international education.

Profiles complements *Open Doors*, IIE's annual report on foreign students in the United States (now in its 29th year) by providing a detailed examination of basic information presented in *Open Doors*. The individual data examined in *Profiles* provide an in-depth profile of the foreign student in the United States. For only the second time in many years, information on country, field of study, academic level, and sex of foreign students can be correlated.

This data, in combination with historical information from IIE surveys conducted since 1949, offers an overview of the impressive growth of the foreign student population in the United States. The reader can follow the evolution of the profile of students from each world region and is given a clear picture of the variations in students from different geographical areas.

1. THE "STEP 3" SURVEY

This second edition of *Profiles* reports on a survey of foreign students conducted during the fall of 1981 and spring of 1982. The survey accompanied the Annual Census of Foreign Students in the United States as an additional step, "STEP 3," asking for data on an individual student basis.

This step was designed to collect data providing a more in-depth profile of the foreign student in the United States. Annual Census data are reported on an institutional basis (see *Open Doors: 1981/82*, New York: Institute of International Education, 1983), permitting an institution to report easily on its foreign student population. However, this does not allow for the correlation of data on the different survey fields requested. It tells us the number of Nigerians, engineering students, sophomores, and females, for example, but does not reveal the number of Nigerian female undergraduates studying engineering.

In the spring of 1979, the Interassociational Committee on Data Collection (ICDC) approved the inclusion of an individual (or correlated) data survey to accompany the Annual Census. The first STEP 3 Survey was carried out in 1979 and 1980 and the results were published in the first edition of *Profiles: The Foreign Student in the United States*, New York: Institute of International Education, 1981. Much of the data from that survey have been included in tables in this edition for comparative purposes.

The survey for this edition of *Profiles* (see **Appendix 6** for sample form) asked each institution to provide information about individual students in the following areas: country of origin, field of study, academic level, and sex*. While additional categories were considered, concern over the institutions' ability to respond dictated their omission.

This book is divided into six sections plus appendices. Section 2 reports on the nationality of foreign students in the United States based on Annual Census data reported in *Open Doors: 1981/82*, focusing on regional

and national subdivisions used in the subsequent sections. Sections 3 to 5 examine field of study, academic level, and gender distribution by region/country of origin, and Section 6 provides data on field-of-study distribution by academic level.

Appendix 1 provides a comparison of Annual Census and STEP 3 numbers of students from each country reported. **Appendix 2** provides a complete breakdown of STEP 3 data by each country, with both numbers and percentages for field of study, academic level, and sex. **Appendix 3**, as previously mentioned, lists all institutions responding to the two surveys; **Appendices 4** and **5** give field of study and country taxonomies, respectively. **Appendix 6** provides a copy of the STEP 3 Survey materials. **Appendix 7** provides field of study/academic level breakdowns for selected states.

All STEP 3 data are provided in percentage terms, which may be used in conjunction with the STEP 3 data provided in **Appendix 2**. Percentage distributions for each major characteristic are tabulated and discussed in the text of the section dealing with that characteristic.

As **Table 1.1** indicates, the response to the STEP 3 survey was gratifying. Of the 2,454 institutions that reported a foreign student enrollment to the Annual Census, 1,845 or 75.2% included STEP 3 data. These institutions provided data on 197,089 individual students—60.4% of the 326,299 foreign students reported in the Annual Census. (**Appendix 3** lists all institutions surveyed in the Annual Census and the STEP 3 Survey.)

While a 60% sample is more than adequate for analytical purposes, a breakdown by major response categories reveals that the STEP 3 Survey data are representative of Annual Census distribution in all major categories. **Table 1.2** summarizes that comparison.

* Institutions also were asked to provide information on initial year of college study and number of dependents. Because response was low in these areas, they were not included in the analysis.

1.1 Type of Response to Survey, 1979/80-1981/82

Type of Response	1979/80**			1981/82		
	Number	Percentage Total Responses	Percentage Reporting Foreign Students	Number	Percentage Total Responses	Percentage Reporting Foreign Students

Europe	8.9	9.0
Latin America	17.0	17.4
Middle East	22.8	22.4
North America	4.7	5.2
Oceania	1.2	1.4
South and East Asia	32.5	31.5
Stateless	0.1	0.2
Academic Level		
Associate	13.3	10.6
Bachelor's	46.5	49.1
Total Undergraduate	59.8	59.7
Graduate	32.6	35.2
Other	7.6	5.1

Table 1.3 shows the percentage response by world region in the three major fields requested. Information on field of study, academic level, and sex was provided in approximately 90% or more of the nationality responses.

Because of the slightly differing response rates shown in Table 1.3 (from 97.1% for field of study to 88.8% for sex), the distribution of grand totals may differ nominally from one table to another, depending on the combination of characteristics used in each. Thus, in a table of field of study by region (e.g., Table 3.1), the bottom line shows 17.9% of all students in business and management, while a table of academic level by field of study (e.g., Table 6.6) shows a comparable figure of 18.1%. These marginal differences have not been rounded, so that the user is provided with an accurate yardstick by which to compare the data within each table.

1.3 Response to STEP 3 Survey: Major Characteristics by World Region (Percentages): 1981/82

World Region	Field of Study	Academic Level	Sex
Africa	97.3	93.5	89.7
Europe	97.0	93.0	89.5
Latin America	96.8	93.3	89.4
Middle East	97.4	91.1	89.5
North America	97.2	90.1	89.2
Oceania	96.8	94.2	91.7
South and East Asia	97.1	93.5	88.7
TOTAL STUDENTS REPORTED*	97.1	92.9	88.8

* Includes totals for students of unknown origin.

2. NATIONALITY

There were 326,299 foreign students in the United States reported in 1981/82 in Open Doors, an increase of 4.6% over the 311,882 students reported in the previous year. As **Table 2.1** and **Figure 2A** indicate, this increase continues a pattern of growth observed in the Annual Census of Foreign Students—a more than ten-fold increase in the number of foreign students over the past 30 years.

The distribution of these students among world regions is detailed in **Table 2.2** and **Figure 2B**. In 1981/82 approximately one-third of all reported foreign students (32.5% to be exact) were from South and East Asia. Next was the Middle East, with 22.8% of all students reported, and Latin America, with 17.0%.

Table 2.2 also illustrates the shift in percentages among and within regions over the years. In 1949/50, the three world regions that sent the largest numbers of students to the United States were Asia, Europe, and Latin America—with more than one-quarter of all foreign students coming from South and East Asia. The percentage of foreign students from South and East Asia reached a high of 39.0% in 1970/71; this region has had the highest percentage for each year reported except 1979/80, when the increasing numbers of students from the Middle East gave that region the largest percentage.

The number of students from the Middle East grew dramatically in recent years. In the 25 years from 1949/50 to 1973/74, the percentage of students reported from this region rose from 8.4% to 12.2% and the number from 2,207 to 18,381 students. By 1979/80 the figures had jumped to 29.2% and 83,700 students. The next two years, however, saw a decline in percentage to 22.8% and in the number of students to 74,390.

Other changes during this period include a steady increase in both the percentage and number of students from Africa, while the proportions, though not the numbers, of foreign students from Europe, Latin America, and North America declined.

The numbers of students from leading countries within each world region since 1949/50 are detailed in **Table 2.3**. Apparent is the dominant role of the leading countries within their region, most clearly demonstrated by Iran in the Middle East and Nigeria in Africa. The eight countries with largest student numbers (Iran, Taiwan, Nigeria, Canada, Japan, Venezuela, India and Saudi Arabia) sent 43% of all foreign students. **Figure 2C** graphically illustrates this dominance of a handful of nations and the relative equality in student numbers from most other countries.

2.1 Foreign Students Reported: 1949/50–1981/82

Year	Students Reported
1949/50	26,433
1950/51	29,813

*Data on Hong Kong was combined with China and Taiwan in 1959/60.

3. FIELD OF STUDY

The fields of study entered by foreign students in the United States are examined in this section (details on field-of-study classifications are provided in **Appendix 4**). In **Table 3.1**, data show that in 1981/82 engineering and engineering technologies were chosen by nearly one-quarter (23.1%) of all students—far more than chose the next most popular field, business and management (17.9%). A far smaller percentage of foreign students chose the third largest field, social science (8.7%).

A breakdown of field-of-study choices within world regions is also provided in **Table 3.1** and **Figure 3A**. Significant differences occurred in the choices of students from different world regions. Most notable is the substantially higher percentage of Middle Eastern students who studied engineering (42.5%), over 20 percentage points higher than any other region. It is, in fact, this region that boosted engineering into top-ranking position among fields of study. South and East Asia was the only other region to show engineering as the number-one choice among fields of study, with 20.7% of all Asian students enrolled in engineering; every other region posted percentages below the average for all regions.

For all regions other than the Middle East and South and East Asia, business and management was the field chosen by the greatest number of students. Nearly one-fourth of African students and one-fifth of Asians pursued studies in this field. Other fields of study showing percentages above average for certain student groups were: the social sciences for students from Africa, Europe, and Oceania; education for students from North America and Oceania; and agriculture for African and Latin American students. Field-of-study choices are distributed most evenly in North America and Oceania.

Table 3.2 and **Figure 3B** provide a historical view of the same relationships shown in **Figure 3A**. The reader should note that comparisons over time are of the proportions of students studying in a given year. Since the total number of students increased dramatically over the period covered (as described in Section 2), the

fact that proportions declined may hide the fact that numbers actually increased substantially. For example, the proportion of African students in health sciences dropped from 10.5% in 1949/50 to 6.0% in 1981/82. In absolute numbers, however, the number of Africans increased from 95 in 1949/50 to 1,430 in 1981/82. Both percentages and actual numbers for 1981/82 are listed in **Appendix 2**. **Figure 3B** displays a fairly consistent pattern since 1949/50 in the field-of-study choices for all regions. Exceptions to this are the proportions of students choosing business and management and mathematics/computer sciences, which increased; and those choosing health and humanities, which declined.

Variations can be observed within regions in **Table 3.2**. For example, students from the Middle East have consistently (and increasingly) chosen engineering as their field of study since 1949/50 at a higher rate than other foreign students in the United States. By contrast, percentages for all other regions except Africa have shown a slight but consistent decrease. Percentages of students choosing business and management increased dramatically in each region over the same 32-year period, while in the field of agriculture, percentages declined for every region except Latin America.

Table 3.3 examines the same relationships as **Table 3.2** for the leading countries within each region. It shows that significant differences in study choices exist among countries in most regions. In Africa, for example, nearly one-third (32.4%) of all Nigerians studied business and management in 1981/82, while only 12.8% studied engineering and 2.0% mathematics/computer science. By contrast, nearly one-half (46.2%) of all Libyans studied engineering, and only 7.9% chose mathematics/computer science and 5.7%, business and management. Nigerian students' interest in business and management increased dramatically in recent years, with a corresponding lowered interest proportionately in health, physical and life sciences, and social sciences.

Kenyan students have been entering agriculture and business and management in high and increasing proportions, while the proportions of Kenyans studying

3A Field of Study by World Region (Percentages): 1981/82*

* Ranked by leading fields within each region.

physical and life sciences and social sciences have declined steadily from once-high levels. Proportionately fewer Kenyans studied engineering than students from other African countries.

Egyptian students' field-of-study choices were proportionately more closely related to their Libyan counterparts than to the rest of the continent, with many choosing engineering and the physical and life sciences and a relative few entering business and management.

Ghana showed some parallels with Nigeria, with an above-average proportion of students in business and management and a lower proportion in engineering. Ghana traditionally sends a higher-than-typical proportion of social science students.

In Europe, Greece sent a high proportion of engineering students and a low proportion of humanities students, and France had a high proportion of business and management students. With the exception of Greece, the leading countries of Europe sent higher proportions of students to pursue fine arts, humanities, and social sciences, and substantially lower proportions to study engineering.

In Latin America, Venezuela showed a high percentage of engineering students in 1981/82, though that percentage has declined over the years, and a sharper-than-average decline in the proportion of students in the health fields. Mexico sent a slightly above-average proportion of students in agriculture and showed a significant increase from 1979/80 in the proportion of students in business and management. Brazil showed a high proportion of students in agriculture, a low proportion in business and management, and a significant decline in proportions of students in engineering since 1949/50. Jamaica showed a larger-than-average increase in business and management students and a large decline in humanities.

Figures on the Middle East reveal one clear pattern: an extraordinary percentage of students from all five countries listed studied engineering. Leading the region was Jordan, with 55.2% of its students in engineering, followed closely by Lebanon with 54.8%. Data in Table 3.3 show that this is not a recent phenomenon—several Middle East countries have sent high proportions of engineering students to the United States since 1949/50.

*** This category was not included until 1978/79.

3B Percentage Distribution of Foreign Students by Major Fields of Study for All Regions: Selected Years, 1949/50—1981/82*

* Fields of study ranked in descending order based on 1981/82 data.

Other notable data include the high (but decreasing) proportion of Saudi Arabians in social sciences and the lower-than-average proportions of students from Iran, Lebanon, and Jordan who studied business and management.

Canada has shown relative stability in the proportions of students in various fields of study over the past 32 years, with only the proportion of business and management students showing a steady increase. Australia has been less stable, with substantial declines in the percentage of students in engineering and physical and life sciences.

In South and East Asia, the leading country, Taiwan, sent one-fourth of its students to pursue engineering in 1981/82. More noteworthy, however, was the proportion of Taiwanese students who chose mathematics/computer science. At 16.5%, the proportion was more than double that for all foreign students, 6.4%. Japan had a low proportion of engineering students, a comparatively high proportion of fine arts students, and a continued decline in the proportion of humanities students (8.7%), once as high as 21.5%. India showed a steady decline in agriculture students and a fluctuating but high proportion of engineering students. Malaysia showed a jump in percentages of business and management, engineering, and mathematics/computer science students and decreasing percentages of students in health, physical and life sciences, and the social sciences.

A breakdown of major engineering specializations for regions and major countries in 1981/82 is provided in **Table 3.4** and **Figure 3C**. Electrical engineering was the most popular of the engineering fields (18.3%), followed by civil engineering (15.0%) and mechanical engineering (12.2%). Somewhat fewer students chose chemical and industrial engineering. Together, these five most popular engineering fields were chosen by 54.8% of all engineering students.

Some differences in the choice of engineering field by foreign students from different regions may be noted in **Table 3.4**. A higher proportion of Asians studied chemical and electrical engineering, while lower proportions were reported in civil engineering and engineering technologies. Latin Americans studied industrial engineering and Middle Easterners civil engineering in greater proportions than did foreign students as a whole. Four regions showed a substantially higher proportion of students in the engineering technologies (usually for the associate degree): Africa, Latin America, North America, and Oceania.

Examining individual countries, some more substantial differences in engineering students can be seen. Nigerians entered electrical and mechanical engineering in relatively low proportions, while a substantial 32.6% studied engineering technologies. Kenya sent few students to pursue mechanical engineering (4.5%) and substantially higher proportions (22.3%) to study the technologies, surpassed in its region only by Nigeria.

All leading countries of Asia except Japan had higher-than-average proportions of engineering students in electrical engineering. Highest of any country or region was Hong Kong's 31.8%.

The leading countries of Europe showed consistently high proportions of students in chemical and mechanical engineering, with Greece leading chemical engineering at 11.5% and France mechanical engineering at 18%.

In Latin America, Venezuela sent low proportions to study civil, electrical, and mechanical engineering, while almost one-fourth of Venezuelan engineering students studied the technologies. Mexico sent almost equal proportions of students (approximately 10%) in four of the five major engineering fields and a high proportion (22.7%) to study electrical engineering. Colombia sent fewer electrical and more industrial engineering students than the foreign student average. More than one-third of all Brazilian engineering students were reported studying "other" engineering sub-

3C

Engineering Subfields (Percentages): 1981/82

fields. A high proportion of Jamaican engineering students (29.3%) studied engineering technologies.

Canadian engineering students entered the five major fields in low proportions and were concentrated in general and "other" engineering subfields and engineering technologies. Australian students followed a similar pattern.

Table 3.5 lists the engineering specialties classified as "other" in the broad classification system used for this survey. Students were distributed disproportionately among the 23 minor engineering fields specified in this table. Most chose aerospace, aeronautical, and astronautical engineering (13.0%), followed by petroleum engineering (9.7%), computer engineering (5.6%), agricultural engineering (5.0%), nuclear engineering (4.8%), and engineering science (4.7%).

3.3 Field of Study by Leading Countries within World Region (Percentages): Selected Years, 1949/50-1981/82

Table 3.6 and Figure 3D provide another view of the relationship between world region and field of study, showing the percentage of students from each region in a particular field. These figures highlight the impact of particular groups of students on specific fields of study in the United States. Some dramatic trends are evident. Most striking is the almost one-half (48.5%) of all mathematics/computer science students coming from South and East Asia, and the sizable 23.6% from the Middle East. These two regions also accounted for approximately 70% of all engineering students.

Table 3.6 confirms the previously noted dominance in agriculture by Africans and Latin Americans. Also notable is the 38.0% of all physical and life science students and 34.7% of all business and management students from South and East Asia. A very high proportion of intensive English students (38.8%) were from Latin America, with South and East Asia contributing another 35.7%.

* The "other" category represents 16.3% of all engineering students (see Table 3.4).

** Engineering subfields not included in NCES field of study classification.

3.6 World Region by Field of Study (Percentages): 1981/82

Field of Study	Africa	Europe	Latin America	Middle East	North America	South and East Asia	Oceania	All Regions

3D World Region by Field of Study (Percentages): 1981/82

4. ACADEMIC LEVEL

Nearly half (49.1%) of all foreign students reported in 1981/82 were enrolled in bachelor's degree programs, up from 45.1% in the 1979/80 survey. Students in graduate degree programs accounted for 35.2% of foreign enrollment, virtually unchanged from the 35.9% in 1979/80, while the percentage of those seeking associate degrees declined to 10.6% from 13.0% in 1979/80. The remaining 5.1% of students were enrolled in intensive English language, practical training, or non-degree programs.

The academic level of foreign students by world region is summarized in **Table 4.1** and illustrated in **Figure 4A**. The table indicates significant regional differences in academic levels.

South and East Asia and Europe showed a substantially larger proportion of graduate students (49.3% and 41.8%, respectively) than other regions. However, these percentages represented declines from the 1979/80 survey. Asians were almost equally divided into graduates and undergraduates in 1981/82.

By contrast, less than 25% of Latin American and Middle Eastern students were enrolled at the graduate level; North America and Oceania sent more than twice as many undergraduates as graduates. North America did show a slight increase from the 1979/80 survey in its proportion of graduate students, while all other regions except the Middle East showed a decline.

Latin America had by far the greatest proportion of students enrolled in associate degree programs (21.1%) and had the only increase in that area from 1979/80 figures. The proportion of Middle Eastern students studying for associate degrees led declines, dropping sharply from 21.3% in 1979/80 to 12.6%.

Table 4.2 subdivides the major academic levels described in **Table 4.1**. As might be expected, slightly more than one-quarter of all foreign students seeking a

bachelor's degree were freshmen. Regionally, however, proportions ranged from a low of 18.0% in 1981/82 for the Middle East to a high of 34.5% for Oceania, followed closely by Latin America (31.8%) and Europe (31.1%).

The Middle East showed significant variations in student enrollment patterns. The region showed a large decrease in the proportion of enrolled freshmen, most likely a consequence of the Iranian crisis. Substantially higher proportions of Middle Easterners were enrolled at junior and senior levels—most likely a result of transfers from associate-degree programs.

At the graduate level, master's degree students accounted for nearly twice as many students as doctoral students, 43.6% compared with 22.8%. On the average, the proportion of master's degree students declined from the 1979/80 survey, while the proportion of doctoral candidates increased.

With few exceptions, regional variations in student proportions were slight. Latin America had the highest proportion of graduate students at the master's level (50.1%); that proportion increased from 45.3% in 1979/80. Europe and North America also showed small increases in the proportion of graduate students at the master's level. Oceania's ratio decreased to 33.6% for the lowest regional percentage of graduate students at the master's level; Africa and South and East Asia also showed slight decreases in this category.

At the doctoral level, most regions showed an increase in proportions over the 1979/80 census. Exceptions were Africa, with a slight decline from 19.7% in 1979/80 to 19.1% in 1981/82, and North America, with a steady 22.6% in each census. A relatively high percentage (8.2%) of North American graduate students were in professional training programs.

Because of the relatively small number of students

4.1 Grouped Academic Level by World Region (Percentages): 1979/80 and 1981/82

involved, greater fluctuations in percentages are to be expected among the "other" academic categories. An impressive increase in every region (including North America) in the proportion of students enrolled in intensive English language programs and a concomitant decrease in the proportion in nondegree programs are worthy of note, however. Also notable are the high percentages of students from North America and Africa who were enrolled in practical training programs and from North America, Europe, and Africa in nondegree programs.

Table 4.3 provides a historical perspective of the data given in Table 4.1. In nearly every region, the proportion of foreign students at the undergraduate level increased and decreased at the graduate level since 1969/70, when percentages of graduate students were at their highest. The undergraduate/graduate proportions of all foreign students in 1981/82 are remarkably close to the corresponding percentages from 1954/55. These changes are illustrated in Figure 4B.

Regionally, more dramatic changes are evident over the same period. Africa sent almost equal numbers of undergraduate and graduate students from 1954/55 to 1969/70, then showed a significant increase in undergraduate percentages over the next 12 years. Even greater was the percentage increase in undergraduates from Oceania—from 36.7% in 1954/55 to 63.8% in 1981/82. The only regions to show decreases in undergraduate percentages from 1954/55 were Latin America and South and East Asia, though these percentages have been on the increase since 1969/70. And the high proportion of graduate students from South and East Asia noted in Table 4.1 appears consistently over the past 27 years.

Table 4.4 shows the distribution by academic level of students from leading countries within each world region. Most countries followed the general regional pattern of an increasing proportion of undergraduate students since 1969/70. Many of these increases followed a 15-year decline; many countries' current ratios of undergraduates to graduates approximate those of 1954/55. Countries displaying increases in undergraduate percentages since the 1954/55 census include Nigeria and Kenya in Africa, the United Kingdom and the Federal Republic of Germany in Europe, and Iran and Lebanon in the Middle East. Countries exhibiting sizable increases in the graduate-student proportions since 1954/55 were Greece and France in Europe, Venezuela and Brazil in Latin America, Kuwait in the Middle East, and Taiwan in South and East Asia.

As has been noted, substantial differences in student trends may exist between countries within the same region. Such differences are most noticeable when examining statistics from South and East Asia. In 1954/55, Japan and Taiwan sent similar proportions of undergraduate and graduate students, but the proportions began to shift significantly in 1969/70 and were dramatically different by 1981/82, when only 17.4% of students from Taiwan were undergraduates as com-

* Ranked by percentage of undergraduates studying in the United States in 1981/82.

pared to 59.2% of Japanese students. Concurrently, Taiwan has sent an extraordinarily high percentage of graduate students since 1969/70; in 1981/82 that ratio was 79.5%, more than double the foreign-student average of 35.2% and significantly higher than Asia's 49.3% average. Furthermore, though student ratios for Japan coincide roughly with averages for all students, they differ significantly from Asia's average and radically from those of India and Taiwan.

Several other countries showed radical variations from the academic-level distribution for foreign-student

totals. Those with higher percentages of undergraduates and lower percentages of graduates were Nigeria and Kenya in Africa; Venezuela, Colombia, and Jamaica in Latin America; all five countries in the Middle East; and Malaysia in South and East Asia. Countries with a substantially higher percentage of graduate students than the average for all regions were Egypt in Africa, France and Italy in Europe, Brazil in Latin America, Australia in Oceania, and Taiwan and India in South and East Asia. For the most part, these trends have remained constant for the last 27 years.

5. DISTRIBUTION BY SEX

This section examines the foreign-student population in the United States by gender. The ratio of men to women among students from each world region is given for 1981/82 in **Table 5.1** and **Figure 5A**. The overall ratio was a disparate 71.5% men to 28.5% women. Two regions, the Middle East and Africa, sent significantly higher-than-average proportions of males to the United States: 83.5% and 80.4% respectively. North American females constituted the highest proportion for a single geographic area, 40.1%.

Table 5.2 and **Figure 5B** present gender ratios of foreign students for selected years since 1952/53. Africa and the Middle East show historically high proportions of male students—with the Middle East reaching a peak of 89.0% in 1952/53.

The overall gradual increase from 1959/60 to 1981/82 in the proportion of female foreign students (from 21.7% to 28.5%) is largely a reflection of the significant increase in women coming from North America, Latin America, Oceania, and Europe. However, the greatest proportional increase in women over the past two years occurred in Africa.

Table 5.3 provides 1981/82 data on gender ratios from leading countries within world regions, and **Table 5.4** places that data in historical perspective. Countries with a much higher proportion of men than the 1981/82 average of 71.5% were Libya (96.2%) in Africa and Saudi Arabia (93.0%), Jordan (92.6%), Kuwait (92.0%), and Lebanon (91.5%) in the Middle East. Jamaica was the only leading country to send a higher proportion of women than men (50.4% and 49.6%, respectively). Countries with a higher proportion of women than the overall average included France (41.5%) and the Federal Republic of Germany (41.2%) in Europe, Japan (39.6%) in South and East Asia, and Canada (39.3%) in North America.

Table 5.4 reveals historically low percentages of women foreign students from such leading countries as Nigeria, Jordan, Kuwait, Saudi Arabia, and Libya. While some of these countries have shown substantial percentage increases in women students, females still comprise a much-lower-than-average percentage of their countries' student populations in the United States.

The leading countries of Asia and Europe had relatively high and, in general, increasing percentages of women among their students in the United States. The exception was Greece, whose ratio of women students dropped from 22.2% in 1952/53 to 18.3% in 1981/82. Several leading countries have at least doubled their percentages of women students since 1959/60. Among these were Venezuela, Colombia, Nigeria, Kenya, Iran, Canada, and Australia.

Table 5.4 also shows that the proportion of women from certain leading countries declined from the 1979/80 survey. Greatest declines in percentages were in Egypt (down 3.2%), Mexico (down 2.3%), and Greece (down 2.0%). Other countries showing declines from

	Japan	60.4	39.6
	India	80.9	19.1
	Malaysia	67.1	32.9
	Hong Kong	65.6	34.4

1979/80 to 1981/82 were Kenya and Libya in Africa, Saudi Arabia in the Middle East, and Malaysia and Hong Kong in South and East Asia.

Table 5.5 shows for 1979/80 and 1981/82 the distribution of foreign students by sex within each field of study. Figure 5C ranks fields of study by the percentage of men in each field in 1981/82. Evident are some substantial differences in the distribution of men and women within different fields.

Most striking in Figure 5C is the almost complete dominance of men among foreign students studying engineering, although women made a slight gain in this field since 1979/80. The sciences—mathematics and computer science, social science, and physical and life sciences—and business and management all had a distribution close to the foreign-student average (nearly three men to every woman reported).

Women comprised at least 40% of students in several fields of study: education (47.5%), health sciences (46.6%), humanities (43.8%), and fine and applied arts (42.0%). A relatively high proportion of women (43.5%) also was reported in "other" fields of study and among those foreign students with no declared field of study (39.4%).

Significantly, the percentage of women students increased from the 1979/80 level in every field of study. The greatest increase occurred in mathematics/compu-

* Data was not specified for 1952/53.

** Data was not specified for 1959/60.

ter sciences, from 25.1% women in 1979/80 to 30.7% in 1981/82. The smallest increase was in intensive English, from 36.5% to 36.6%.

Table 5.6 subdivides field-of-study data from **Table 5.5** by world regions. The extremely high proportion of men studying engineering reported in **Table 5.5** held true for all regions in 1981/82, ranging from 89.1% for Latin America to 96.7% for Africa. In every region, however, women posted small increases in their proportions in engineering over 1979/80. In agriculture, business and management, and physical and life sciences, also fields with historically high percentages of male students, the percentages of women students rose in almost every region. By contrast, the proportion of women in fine and applied arts declined for every region except Africa and Latin America, though the all-region average inched up from 41.6% in 1979/80 to 42.0% in 1981/82.

The male-female ratio among students from different world regions appears far less uniform in other fields of study than in engineering. In 1981/82, the proportions of men in fine and applied arts ranged from 51.5% among students from South and East Asia to 83.8% from Africa. In the field of education, percentages ranged from 38.5% males from Latin America to 70.0% from Africa. And in the humanities, only 44.4% of students from Europe were men, while Africa again had the highest proportion of male students, 74.8%.

Regionally, women formed the majority of foreign students in only three fields: in education (from Latin America, North America, South and East Asia, and Europe); in health sciences (from Latin America and North America); and in humanities (from Europe).

In some fields there were significant shifts in the proportions of men and women students from the 1979/80 survey. In health sciences, the proportion of female students from Latin America jumped from 16.1% in 1979/80 to 59.8% in 1981/82. In the Middle East, females among health students increased from 26.1% to 37.1%. Among students in the health sciences from

5.5 Sex Distribution by Field of Study (Percentages): 1979/80-1981/82

Field of Study	1979/80		1981/82	
	Male	Female	Male	Female
Agriculture	86.4	13.6	85.3	14.7
Business and Management	74.8	25.2	72.7	27.3
Education	53.5	46.5	52.5	47.5
Engineering	94.6	5.4	93.1	6.9
Fine and Applied Arts	58.4	41.6	58.0	42.0
Health Sciences	57.0	43.0	53.4	46.6

Physical and Life Sciences	75.1	24.9	72.9	27.1
Social Sciences	67.5	32.5	66.3	33.7
Other	58.6	41.4	56.5	43.5
Intensive English Language	63.5	36.5	63.4	36.6
Undeclared	61.1	38.9	60.6	39.4
ALL FIELDS	73.4	26.6	71.5	28.5

North America, the proportion of females increased from 54.3% to 59.4%.

In physical and life sciences, the proportion of female students from the Middle East increased from 22.1% to 25.0%. In mathematics/computer sciences, female students from Africa increased from 13.2% to 19.3%; from Oceania, females jumped from 9.4% to 25.3%. In education, among students from South and East Asia the proportion of females dropped from 58.9% to 54.5%.

Table 5.7 extends the gender breakdown within each field of study to the leading countries in each world region in 1981/82. Not only world regions but countries within each region varied markedly in proportions of men to women in specific fields of study; the only major field with little variation among countries was engineering, with a consistently high proportion of men.

In Africa, Kenya had a higher proportion of women than other countries in several fields, including fine and applied arts, health sciences, and mathematics/computer sciences. The contrast is particularly noteworthy in

	1981/82	85.3	14.7	72.7	27.3	52.5	47.5	93.1	6.9	58.0	42.0	53.4	46.6

fine and applied arts, with 61.5% of Kenyan students women.

Notable in comparison with regional averages in Europe is the high proportion of Greek men who studied the health and social sciences and "other" fields of study. Also noteworthy is the 55.4% of men from the United Kingdom who studied education and the 56.2% who studied the humanities, two fields in which the majority of European students in 1981/82 were women (53.9% and 55.6%, respectively).

Among leading Latin American countries, gender distribution varied considerably in the fields of health sciences and the humanities. Only from Mexico was the majority of health science students male (58.3%). Among the other Latin American countries, both Colombia and Jamaica showed a very high proportion of females in health fields, 72.0% and 70.6%, respectively. In the humanities, the majority of students from Mexico, Brazil and Jamaica were male, while from both Venezuela and Colombia males accounted for only 36.5% of students.

As noted previously, Jamaica had a slightly higher overall proportion (50.4%) of women than men students; compared to women from other Latin American countries, these Jamaican women were represented disproportionately in business and management, education, health sciences, mathematics/computer sciences, physical and life sciences, social sciences, and the "other" fields-of-study category.

Interestingly, because Iran had more than double the proportion of female students and nearly 50% of the total number of students from Middle Eastern countries in 1981/82, Iranian data tend to mask somewhat in the regional distributions the very high proportions of males from other Middle Eastern countries found in such fields as business and management, fine and applied arts, and mathematics/computer sciences.

In South and East Asia, the distribution of male and female students within specific fields was even less uniform than in other world regions. In business and

management, for example, there was an almost even split between men and women from Taiwan (51.4% to 48.6%) and a slightly less even split from Hong Kong (58.4% to 41.6%), while a much lower proportion of Indian students were female (14.9% compared to 85.1% male).

Striking differences among Asian countries are also found in education, health sciences, the humanities, and physical and life sciences. In education, 71.2% of Taiwanese students were women, compared to only 36.4% of Malaysian students. Slightly more than half of Malaysian students in health sciences were women (50.5%), while the majority from other leading countries were men. There were nearly two Indian men for every woman (61.5% to 38.5%) studying the humanities, but this ratio was reversed for Malaysian students (38.3% to 61.7%). There also were more Malaysian women (50.9%) than men studying physical and life sciences, in contrast to other Asian countries, from which an average of three-quarters of the students were men.

Table 5.8 shows the distribution of foreign students by gender among academic levels for 1981/82, illustrated in Figure 5D. It shows a higher proportion of women among bachelor's degree candidates (30.0%) than among graduate students (23.9%). Moreover, among bachelor's degree students, there was a somewhat higher proportion of women among lower than upper classes (ranging from 31.7% of freshmen to 27.6% of seniors). The proportion of males to females at the doctorate level was higher than at the master's level. Relatively higher proportions of women pursued non-degree and intensive English programs than other academic levels.

Table 5.9 and Figure 5E show the distribution of foreign students by gender and by aggregate academic level for each world region. While women constituted 30.4% of all undergraduate and 23.9% of all graduate foreign students, regionally these proportions differed widely. At the graduate level, the proportion of women students ranged from 13.7% of Africans to 32.6% of

5B Sex Distribution by World Region* (Percentages): Selected Years, 1952/53–1981/82

MIDDLE EAST

AFRICA

SOUTH AND EAST ASIA

OCEANIA

EUROPE

LATIN AMERICA

NORTH AMERICA

North Americans. Among undergraduates, percentages of women ranged from 16.5% of Middle Easterners to 43.0% of North Americans. More than half (55.6%) of all students from North America pursuing "other" academic levels (practical training, nondegree, and intensive English programs) were women.

Table 5.10 provides additional details on gender distribution by looking at the five largest fields of study at the undergraduate and graduate levels for each region and its leading countries. The general pattern of high proportions of males in these fields is confirmed in this table. However, where Table 5.9 indicates lower proportions of female graduate students than undergraduates in each region except the Middle East, Table 5.10 reveals some interesting variations to that pattern.

In engineering, while the dominance of males is clear, particularly among graduates, there were higher proportions of female graduates (5.3%) than undergraduates (2.9%) from Africa, with only Kenya among leading countries sending proportionately more female undergraduates than graduates. In other regions, other countries showing higher proportions of female engineering graduate students than undergraduates were Malaysia, France, Venezuela, Brazil, Saudi Arabia, and Kuwait. While females composed only 6.7% of the graduate engineering population, the proportion was 12% or greater for France, Venezuela, Brazil, and Jamaica.

5C Sex Distribution by Field of Study (Percentages): 1981/82*

* Ranked by percentage of men in each field of study.

< * Ranked by percentage of men studying in the United States in 1981/82.

In business and management, the overall proportion of females was 28.6% among undergraduates and 19.5% among graduates. There were substantial differences among leading countries, however. African and Middle Eastern countries sent lower-than-average proportions of women at both the undergraduate (with the exception of Iran) and graduate level. Several countries with higher-than-average proportions of women undergraduates in business and management included: Taiwan (61.9%), Hong Kong (46.9%), Jamaica (45.9%), Venezuela (36.8%), France (36.6%), and Iran (36.1%). At the graduate level, in South and East Asia, 43.9% of all Taiwanese business students were women, while the comparable figure for Japan was a regional low of 6.4%. For Europe, the range was 30.3% from Italy and 7.1% from Greece; for Latin America, 45.5% from Jamaica and 8.0% from Mexico; for the Middle East, 16.5% from Iran and 2.8% from Kuwait; for Africa, 14.7% from Egypt and none from Libya.

In the social sciences, women comprised 39.6% of all undergraduates and 27.4% of all graduates. Variations in this field were not as great as those in business and management, with African and Middle Eastern countries showing the largest differences from regional averages. At the undergraduate level, only 12.0% of Libyan social science students in the United States were female, compared with 26.3% regionally; Greece sent 24.2% compared with 45.5% for Europe as a whole; Iran (48.2%) and Saudi Arabia (8.0%) varied markedly from the Middle Eastern average (29.5%). At the graduate level, countries with substantially lower proportions of women social scientists than at the undergraduate level (20% or more) were Italy, Mexico, Brazil, Iran, Japan, Hong Kong, and Australia. Only Egypt, Greece, Lebanon, and Kuwait and the region of Oceania had higher proportions of graduate females than undergraduates.

The overall proportions of women in the physical and life sciences were 34.3% at the undergraduate level

and 21.6% at the graduate. African countries sent lower-than-average proportions of women at both levels, while most South and East Asian countries sent higher-than-average proportions. Among undergraduates, Jamaica and Malaysia had more women than men studying physical and life sciences (52.1% and 54.6%, respectively). As with the other fields of study, there were lower proportions of women graduate students reported for nearly all countries. The exceptions were Australia (22.0% graduate and 17.4% undergraduate), Venezuela (39.3% and 39.1%), and Kuwait, whose proportion of women graduates in the physical and life sciences was nearly three times that for undergraduates (46.7% and 15.8%).

In mathematics/computer sciences, women composed 33.2% of all undergraduates and 25.3% of all graduate students in these fields. As in the social sciences, the largest variations from regional averages occurred among African and Middle Eastern countries. Libya and Ghana sent very low proportions of women at both academic levels, while Kenya sent high proportions. Among Middle Eastern countries, Iran's higher-than-average proportion of women undergraduates (34.2%) was countered by lower-than-average proportions from Saudi Arabia (5.3%), Lebanon (8.5%), Jordan (10.9%) and Kuwait (7.6%). At the graduate level, Jamaica (50.0%), Kenya (42.9%), Taiwan (38.6%), and Malaysia (32.0%) sent high proportions of women in mathematical/computer science, while Ghana sent no women at the graduate level and Libya (6.1%) and Jordan (5.3%) sent very low proportions. Asian countries all sent higher-than-average proportions of females at the undergraduate level, and only North America (41.2%) surpassed Asia's 40.5% regional average.

5E Sex Distribution by World Region/Academic Level (Percentages): 1981/82

6. FIELD OF STUDY/ACADEMIC-LEVEL RELATIONSHIPS

Relationships among fields of study and academic levels are examined in this section. The 1981/82 academic-level breakdown for each major field of study is shown in **Table 6.1**. While 59.5% of foreign students were undergraduates and 35.5% were graduates, their distribution varied widely in the different fields of study.

The most noteworthy relationship was the relatively high percentage of undergraduates (67.9%) in the field of study with the most students, engineering. In business and management, the second largest field in enrollment, 69.0% of students were undergraduates. Among the major fields, only fine and applied arts had a greater percentage of undergraduates (71.0%) than graduates.

In five major fields of study a majority of students studied at the graduate level. In descending order, they were the humanities, education, agriculture, social sciences, and physical and life sciences.

Table 6.2 provides a historical perspective of data in **Table 6.1** for selected years beginning with 1963/64. It should be noted that the fields of study in this table are grouped into eight categories that reflect the different classifications used in earlier surveys. Data from 1979/80 and 1981/82 were regrouped to conform with historical data.

Although percentages have fluctuated considerably over the years, in most fields the proportion of undergraduates was larger in 1981/82 than in 1963/64, the major exception being education. The largest increases in the proportions of undergraduates occurred in the physical and life sciences, health sciences, and humanities.

Regional data on field-of-study/academic-level relationships are presented in **Table 6.3**. Major differences in these relationships can be seen among regions in the major fields of study. Several variations from the student averages in 1981/82 are worth noting.

In engineering, for example, while 67.9% of all students were undergraduates, only 42.5% of all Asian engineering students were undergraduates, a low among regions. In contrast, 83.0% of all engineering students from the Middle East and 81.4% from North America (principally Canada) were undergraduates.

Slightly less than one-third of all foreign students in business and management studied at the graduate level. Among regions, however, proportions for graduate students ranged from lows of 14.5% and 20.0% in Oceania and the Middle East to highs of 41.4% and 40.5% in Europe and South and East Asia.

In the social sciences, a significantly higher-than-average percentage of Asian students (65.9%) pursued graduate studies. In contrast, the percentages of graduate students from Oceania (40.1%), Latin America (40.4%), and North America (43.2%) were less than that for all students (53.3%).

More than seven of every 10 Asians studying the physical and life sciences were graduate students,

compared with 52.9% of all students enrolled in these disciplines. However, the only other region that sent more graduate students than undergraduate in the physical and life sciences was Europe (52.8%).

While only 38.5% of all mathematics/computer science students were graduate students, regional percentages from Europe and South and East Asia were much higher (51.0% and 48.6%, respectively). Substantially lower-than-average percentages of students from Latin America and the Middle East studied at the graduate level (21.9% and 23.2%, respectively).

A very high proportion of all Asian students studying agriculture (83.0%) pursued a graduate degree—the highest regional proportion of graduate students for any field.

These regional differences in field-of-study/academic relationships are expanded upon in **Table 6.4**, which shows that graduate/undergraduate proportions may differ widely in countries within each region in the various fields of study.

For example, although the majority of engineering students from Asian countries in 1981/82 were graduate students, 90.3% of engineering students from Malaysia were undergraduates. In most major fields of study, more Malaysians studied as undergraduates, while students from Taiwan and India were predominantly graduates.

Another region showing substantial differences among countries was Oceania. In every field except the humanities, the majority of students from this region pursued undergraduate studies, with percentages as high as 70.4% for engineering and 85.3% for business

* Field-of-study categories in this table are from 1963-1974. Humanities includes architecture, fine arts, and liberal arts; physical and life sciences includes mathematics; social sciences includes home economics and law. 1979/80 and 1981/82 survey data have been adjusted to be compatible with these categories.

and management. In contrast, the proportions of Australians studying at the undergraduate level was much lower; engineering and business and management enrolled 55.6% and 59.8%, respectively.

Also notable were the high proportions of graduate students from Egypt and Brazil in such fields as engineering, business and management, and physical and life sciences, in comparison with other countries in Africa and Latin America, which had greater proportions of undergraduates in these disciplines.

For those interested in examining the field-of-study/academic-level distribution of foreign students among states, the proportions of students at each academic level in the five most popular fields are listed in **Appendix 7** for the nine states with the greatest numbers of foreign students (California, New York, Texas, Florida, Massachusetts, Illinois, Michigan, Ohio, and Pennsylvania) and the District of Columbia.

Additional details of the relationship between field of study and academic level are provided in **Tables 6.5** and **6.6** and **Figure 6A**. These tables show the distribution of foreign students by field and academic level. Nearly one in six students was an undergraduate in engineering or engineering technologies in 1981/82, a substantially higher percentage than at the graduate level (7.0%). In business and management, 12.5% of all

foreign students in the United States were undergraduates and 5.3% were graduates. The next-largest field of study was the social sciences, with 3.9% of all undergraduates and 4.6% of graduates.

Table 6.6 provides historical data on students by field and academic level from surveys beginning in 1963/64. The most significant changes have been a steady increase in business students at both the undergraduate and graduate levels, a decrease at both levels in the humanities in the last 10 years, a drop in the proportion of graduate students in the physical and life sciences since 1963/64, and decreasing proportions of both undergraduates and graduates in the social sciences.

Table 6.7 provides field-of-study breakdowns within each academic level. Nearly 50% of all undergraduate foreign students in 1981/82 studied engineering or business and management (25.9% and 20.9%, respectively), with comparatively small percentages distributed fairly evenly among the other major fields. Among graduate students, engineering (19.8%) and business and management (14.8%) again were the most popular choices, but were closely followed by the social sciences (13.1%) and the physical and life sciences (11.0%). In the relatively small "other" academic category, intensive English language students predominated at 59.5%.

6.3 Field of Study by World Region/Academic Level (Percentages): 1981/82

APPENDIX 4: Fields of Study

Major Field-of-Study Categories

AGRICULTURE

- 01 Agribusiness and Agricultural Production
- 02 Agricultural Sciences
- 03 Renewable Natural Resources

ARCHITECTURE AND ENVIRONMENTAL DESIGN

- 04 Architecture and Environmental Design

AREA AND ETHNIC STUDIES

- 05 Area and Ethnic Studies

BUSINESS

- 06 Business and Management
- 07 Business and Office
- 08 Marketing and Distribution

COMMUNICATIONS

- 09 Communications
- 10 Communication Technologies

COMPUTER AND INFORMATION SCIENCES

- 11 Computer and Information Sciences

CONSUMER, PERSONAL, AND MISCELLANEOUS SERVICES

- 12 Consumer, Personal, and Miscellaneous Services

EDUCATION

- 13 Education

ENGINEERING

- 14 Engineering
- 15 Engineering and Engineering Related Technologies

FOREIGN LANGUAGES

- 16 Foreign Languages

HEALTH

- 17 Allied Health
- 18 Health Sciences

HOME ECONOMICS

- 19 Home Economics
- 20 Vocational Home Economics

INDUSTRIAL ARTS

- 21 Industrial Arts

LAW

- 22 Law

LETTERS

- 23 Letters

LIBERAL/GENERAL STUDIES

- 24 Liberal/General Studies

LIBRARY AND ARCHIVAL SCIENCES

- 25 Library and Archival Sciences

LIFE SCIENCES

- 26 Life Sciences

MATHEMATICS

- 27 Mathematics

MILITARY SCIENCES

- 28 Military Sciences
- 29 Military Technologies

MULTI/INTERDISCIPLINARY STUDIES

- 30 Multi/Interdisciplinary Studies

PARKS AND RECREATION

- 31 Parks and Recreation

PERSONAL AND SOCIAL DEVELOPMENT

- 32 Basic Skills
- 33 Citizenship/Civic Activities
- 34 Health-Related Activities
- 35 Interpersonal Skills
- 36 Leisure and Recreational Activities
- 37 Personal Awareness

PHILOSOPHY, RELIGION, AND THEOLOGY

- 38 Philosophy and Religion
- 39 Theology

PHYSICAL SCIENCES

- 40 Physical Sciences
- 41 Science Technologies

PSYCHOLOGY

- 42 Psychology

PUBLIC AFFAIRS AND PROTECTIVE SERVICES

- 43 Protective Services
- 44 Public Affairs

SOCIAL SCIENCES

- 45 Social Sciences

TRADE AND INDUSTRIAL

- 46 Construction Trades
- 47 Mechanics and Repairers
- 48 Precision Production
- 49 Transportation and Material Moving

VISUAL AND PERFORMING ARTS

- 50 Visual and Performing Arts

INTENSIVE ENGLISH LANGUAGE

- 60 Intensive English Language

UNDECLARED

- 90 Undeclared

Detailed Field-of-Study Categories

A classification of instructional programs produced by
the National Center for Education Statistics

CODE FIELD OF STUDY

01.000 AGRIBUSINESS AND AGRICULTURAL PRODUCTION

01.0101 Agricultural business and management, general
01.0102 Agricultural business
01.0103 Agricultural economics
01.0104 Farm and ranch management
01.0199 Agricultural business and management, other
01.0201 Agricultural mechanics, general
01.0202 Agricultural electrification, power, and controls
01.0203 Agricultural mechanics, construction, and maintenance skills
01.0204 Agricultural power machinery
01.0205 Agricultural structures, equipment, and facilities
01.0206 Soil and water mechanical practices
01.0299 Agricultural mechanics, other
01.0301 Agricultural production, general
01.0302 Animal production
01.0303 Aquaculture
01.0304 Crop production
01.0305 Game farm management
01.0399 Agricultural production, other
01.0401 Agricultural products and processing, general
01.0402 Food products
01.0403 Nonfood products
01.0499 Agricultural products and processing, other
01.0501 Agricultural services and supplies, general
01.0502 Agricultural services
01.0503 Agricultural supplies marketing
01.0504 Animal grooming
01.0505 Animal training
01.0506 Horseshoeing
01.0599 Agricultural services and supplies, other
01.0601 Horticulture, general
01.0602 Arboriculture
01.0603 Floriculture
01.0604 Greenhouse operation and management
01.0605 Landscaping
01.0606 Nursery operation and management
01.0607 Turf management
01.0699 Horticulture, other
01.0701 International agriculture
01.9999 Agribusiness and agricultural production, other

02.000 AGRICULTURAL SCIENCES

02.0101 Agricultural sciences, general
02.0201 Animal sciences, general
02.0202 Animal breeding and genetics
02.0203 Animal health
02.0204 Animal nutrition
02.0205 Animal physiology
02.0206 Dairy
02.0207 Fisheries science
02.0208 Livestock
02.0209 Poultry
02.0299 Animal sciences, other
02.0301 Food sciences, general
02.0302 Dairy processing
02.0303 Food distribution
02.0304 Food engineering
02.0305 Food packaging
02.0306 Food technology
02.0399 Food sciences, other
02.0401 Plant sciences, general
02.0402 Agronomy
02.0403 Horticulture science
02.0404 Ornamental horticulture
02.0405 Plant breeding and genetics
02.0406 Plant pathology (applied)
02.0407 Plant physiology
02.0408 Plant protection (pest management)
02.0409 Range management
02.0410 Turf management science
02.0499 Plant sciences, other
02.0501 Soil sciences, general
02.0502 Soil chemistry
02.0503 Soil conservation

02.0504 Soil management and fertility
02.0505 Soil microbiology
02.0506 Soil physics
02.0599 Soil sciences, other
02.9999 Agricultural sciences, other

03.000 RENEWABLE NATURAL RESOURCES

03.0101 Renewable natural resources, general
03.0201 Conservation and regulation, general
03.0202 Conservation
03.0203 Resources protection and regulation
03.0299 Conservation and regulation, other
03.0301 Fishing and fisheries, general
03.0302 Fisheries
03.0399 Fishing and fisheries, other
03.0401 Forestry production and processing, general
03.0402 Forest production
03.0403 Forest products utilization
03.0404 Forest products processing technology
03.0405 Logging
03.0406 Pulp and paper production
03.0499 Forestry production and processing, other
03.0501 Forestry and related sciences, general
03.0502 Forestry science
03.0503 Forest biology
03.0504 Forest engineering
03.0505 Forest hydrology
03.0506 Forest management
03.0507 Forest mensuration
03.0508 Urban forestry
03.0509 Wood science
03.0599 Forestry and related sciences, other
03.0601 Wildlife management
03.9999 Renewable natural resources, other

04.000 ARCHITECTURE AND ENVIRONMENTAL DESIGN

04.0101 Architecture and environmental design, general
04.0201 Architecture
04.0301 City, community, and regional planning
04.0401 Environmental design
04.0501 Interior design
04.0601 Landscape architecture
04.0701 Urban design
04.9999 Architecture and environmental design, other

05.000 AREA AND ETHNIC STUDIES

05.0101 African studies
05.0102 American studies
05.0103 Asian studies, general
05.0104 East Asian studies
05.0105 Eastern European studies
05.0106 European studies, general
05.0107 Latin American studies
05.0108 Middle Eastern studies
05.0109 Pacific area studies
05.0110 Russian and Slavic studies
05.0111 Scandinavian studies
05.0112 South Asian studies
05.0113 Southeast Asian studies
05.0114 Western European studies
05.0199 Area studies, other
05.0201 Afro-American (black) studies
05.0202 American Indian studies
05.0203 Hispanic-American studies
05.0204 Islamic studies
05.0205 Jewish studies
05.0299 Ethnic studies, other
05.9999 Area and ethnic studies, other

06.000 BUSINESS AND MANAGEMENT

06.0101 Business and management, general
06.0201 Accounting
06.0301 Banking and finance
06.0401 Business administration and management, general

06.0402 Contract management and procurement/purchasing
 06.0403 Product management
 06.0404 Systems efficiency analysis
 06.0499 Business administration and management, other
 06.0501 Business economics
 06.0601 Human resources development
 06.0701 Hotel/motel management
 06.0702 Recreational enterprises management
 06.0703 Resort management
 06.0704 Restaurant management
 06.0705 Transportation management
 06.0799 Institutional management, other
 06.0801 Insurance and risk management
 06.0901 International business management
 06.1001 Investments and securities
 06.1101 Labor/industrial relations
 06.1201 Management information systems
 06.1301 Business statistics
 06.1302 Operations research (quantitative methods)
 06.1399 Management science, other
 06.1401 Marketing management
 06.1402 Marketing research
 06.1499 Marketing management and research, other
 06.1501 Organizational behavior
 06.1601 Personnel management
 06.1701 Real estate, general
 06.1702 Commercial property
 06.1703 Property management
 06.1704 Real estate appraisal
 06.1705 Real estate finance
 06.1706 Real estate law
 06.1707 Residential property
 06.1799 Real estate, other
 06.1801 Small business management
 06.1802 Small business ownership
 06.1899 Small business management and ownership, other
 06.1901 Taxation
 06.2001 Trade and industrial supervision and management
 06.9999 Business and management, other

07.0000 BUSINESS AND OFFICE

07.0101 Accounting, bookkeeping, and related programs, general
 07.0102 Accounting and computing
 07.0103 Bookkeeping
 07.0104 Machine billing, bookkeeping, and computing
 07.0199 Accounting, bookkeeping, and related programs, other
 07.0201 Banking and related financial programs, general
 07.0202 Credit collection clerk
 07.0203 Insurance clerk
 07.0204 Loan clerk
 07.0205 Teller
 07.0206 Transit clerk
 07.0299 Banking and related financial programs, other
 07.0300 Business data processing and related programs
 07.0301 Business data processing and related programs, general
 07.0302 Business computer and console operation
 07.0303 Business data entry equipment operation
 07.0304 Business data peripheral equipment operation
 07.0305 Business data programming
 07.0306 Business systems analysis
 07.0399 Business data processing and related programs, other
 07.0401 Office supervision and management
 07.0501 Personnel and training programs, general
 07.0502 Educational assisting and training
 07.0503 Personnel assisting
 07.0599 Personnel and training programs, other
 07.0601 Secretarial and related programs, general
 07.0602 Court reporting
 07.0603 Executive secretarial
 07.0604 Legal secretarial
 07.0605 Medical secretarial
 07.0606 Secretarial
 07.0607 Stenographic
 07.0608 Word processing
 07.0699 Secretarial and related programs, other
 07.0701 Typing, general office, and related programs, general
 07.0702 Clerk-typist
 07.0703 Correspondence clerk
 07.0704 Duplicating machine operation
 07.0705 General office clerk
 07.0706 Mail and order clerk
 07.0707 Receptionist and communication systems operation
 07.0708 Shipping, receiving, and stock clerk
 07.0709 Traffic, rate, and transportation clerk

07.0710 Typing
 07.0799 Typing, general office, and related programs, other
 07.9999 Business and office, other

08.0000 MARKETING AND DISTRIBUTION

08.0101 Apparel and accessories marketing, general
 08.0102 Fashion merchandising
 08.0103 Fashion modeling
 08.0104 Footwear marketing
 08.0105 Jewelry marketing
 08.0199 Apparel and accessories marketing, other
 08.0201 Business and personal services marketing, general
 08.0202 Display
 08.0203 Marketing of business or personal services
 08.0299 Business and personal services marketing, other
 08.0301 Entrepreneurship, general
 08.0401 Financial services marketing, general
 08.0402 Banking marketing
 08.0403 Credit marketing
 08.0404 Credit union marketing
 08.0405 Savings and loan marketing
 08.0406 Securities and commodities marketing
 08.0499 Financial services marketing, other
 08.0501 Floristry, farm, and garden supplies marketing, general
 08.0502 Farm and garden supplies marketing
 08.0503 Floristry
 08.0599 Floristry, farm, and garden supplies marketing, other
 08.0601 Food marketing, general
 08.0602 Convenience store marketing
 08.0603 Specialty foods marketing
 08.0604 Supermarket marketing
 08.0605 Wholesale food marketing
 08.0699 Food marketing, other
 08.0701 Auctioneering
 08.0702 Industrial sales
 08.0703 International marketing
 08.0704 Purchasing
 08.0705 Retailing
 08.0706 Sales
 08.0707 Wholesaling
 08.0799 General marketing, other
 08.0801 Home and office products marketing, general
 08.0802 Appliance marketing
 08.0803 Building materials marketing
 08.0804 Floor coverings, draperies, and upholstery marketing
 08.0805 Furniture marketing
 08.0806 Hardware marketing
 08.0807 Office products and equipment marketing
 08.0808 Specialty home furnishings marketing
 08.0899 Home and office products marketing, other
 08.0901 Hospitality and recreation marketing, general
 08.0902 Marketing of hotel/motel services
 08.0903 Marketing of recreational services
 08.0904 Recreational products marketing
 08.0905 Waiter/waitress and related services
 08.0999 Hospitality and recreation marketing, other
 08.1001 Insurance marketing, general
 08.1002 Accident and health insurance marketing
 08.1003 Life insurance marketing
 08.1004 Property and casualty insurance marketing
 08.1099 Insurance marketing, other
 08.1101 Transportation and travel marketing, general
 08.1102 Freight transportation marketing
 08.1103 Passenger transportation marketing
 08.1104 Tourism
 08.1105 Travel services marketing
 08.1106 Warehouse services marketing
 08.1199 Transportation and travel marketing, other
 08.1201 Vehicles and petroleum marketing, general
 08.1202 Agricultural implements and machinery marketing
 08.1203 Automotive vehicles and accessories marketing
 08.1204 Petroleum wholesaling
 08.1205 Recreational vehicles and accessories marketing
 08.1206 Service station retailing
 08.1207 Vehicle rental and leasing
 08.1299 Vehicles and petroleum marketing, other
 08.9999 Marketing and distribution, other

09.0000 COMMUNICATIONS

09.0101 Communications, general
 09.0201 Advertising
 09.0301 Communications research
 09.0401 Journalism (mass communications)

09.0501	Public relations	13.1302	Art education
09.0601	Radio/television news broadcast	13.1303	Business education
09.0701	Radio/television, general	13.1304	Driver and safety education
09.9999	Communications, other	13.1305	English education
10.0000	COMMUNICATION TECHNOLOGIES	13.1306	Foreign languages education
10.0101	Educational media technology	13.1307	Health education
10.0102	Motion picture technology	13.1308	Home economics education
10.0103	Photographic technology	13.1309	Industrial arts education
10.0104	Radio and television production and broadcasting technology	13.1310	Marketing and distributive education
10.0199	Communication technologies, other	13.1311	Mathematics education
11.0000	COMPUTER AND INFORMATION SCIENCES	13.1312	Music education
11.0101	Computer and information sciences, general	13.1313	Nutritional education
11.0201	Computer programming	13.1314	Physical education
11.0301	Data processing	13.1315	Reading education
11.0401	Information sciences and systems	13.1316	Science education
11.0501	Systems analysis	13.1317	Social science education
11.9999	Computer and information sciences, other	13.1318	Social studies education
12.0000	CONSUMER, PERSONAL, AND MISCELLANEOUS SERVICES	13.1319	Technical education
12.0101	Drycleaning and laundering services, general	13.1320	Trade and industrial education
12.0102	Drycleaning	13.1399	Teacher education, specific subject areas, other
12.0103	Laundering	13.1401	Teaching English as a second language/foreign language
12.0199	Drycleaning and laundering services, other	13.9999	Education, other
12.0201	Entertainment services, general	14.0000	ENGINEERING
12.0202	Bartering	14.0101	Engineering, general
12.0203	Card dealing	14.0201	Aerospace, aeronautical, and astronautical engineering
12.0204	Umpiring	14.0301	Agricultural engineering
12.0299	Entertainment services, other	14.0401	Architectural engineering
12.0301	Funeral services	14.0501	Bioengineering and biomedical engineering
12.0401	Personal services, general	14.0601	Ceramic engineering
12.0402	Barbering	14.0701	Chemical engineering
12.0403	Cosmetology	14.0801	Civil engineering
12.0404	Electrolysis	14.0901	Computer engineering
12.0405	Massage	14.1001	Electrical, electronics, and communications engineering
12.0499	Personal services, other	14.1101	Engineering mechanics
12.9999	Consumer, personal, and miscellaneous services, other	14.1201	Engineering physics
13.0000	EDUCATION	14.1301	Engineering science
13.0101	Education, general	14.1401	Environmental health engineering
13.0201	Bilingual/bicultural education	14.1501	Geological engineering
13.0301	Curriculum and instruction	14.1601	Geophysical engineering
13.0401	Education administration, general	14.1701	Industrial engineering
13.0402	Administration of special education	14.1801	Materials engineering
13.0403	Adult and continuing education administration	14.1901	Mechanical engineering
13.0404	Educational supervision	14.2001	Metallurgical engineering
13.0405	Elementary and secondary education administration	14.2101	Mining and mineral engineering
13.0406	Higher education administration	14.2201	Naval architecture and marine engineering
13.0407	Community college education administration	14.2301	Nuclear engineering
13.0499	Education administration, other	14.2401	Ocean engineering
13.0501	Educational media	14.2501	Petroleum engineering
13.0601	Evaluation and research, general	14.2601	Surveying and mapping sciences
13.0602	Adult and continuing education research	14.2602	Cartography
13.0603	Educational statistics and research	14.2701	Systems engineering
13.0604	Educational testing, evaluation, and measurement	14.2801	Textile engineering
13.0605	Elementary and secondary research	14.9999	Engineering, other
13.0606	Higher education research	15.0000	ENGINEERING AND ENGINEERING RELATED TECHNOLOGIES
13.0699	Evaluation and research, other	15.0101	Architectural design and construction technology
13.0701	International and comparative education	15.0102	Architectural interior design technology

APPENDIX 6: Survey Materials

ICDC

Interassociational Committee on Data Collection

AACRAO · IIE · NAFSA

October 8, 1981

Dear Colleague:

We are writing to request your continued cooperation in the Annual Census of Foreign Students in the United States. Our request to you this year involves three steps:

- STEP 1: A preliminary reply postcard report of the total number of foreign students at your institution. Please fill out and return this postcard as soon as possible.
- STEP 2: Completion of the institutional data form. Please read the detailed instructions on the enclosed form. This form includes a printout of the data provided by your institution last year. This data is for your information only and should not be modified or corrected.
- STEP 3: Providing data at the individual student level either by filling out the form supplied or sending an appropriate student roster. Please read the detailed instructions for STEP 3 on the enclosed form.

As you know, the results of the Census are reported each year in Open Doors, a publication which is widely used by government, business, institutions of higher education, and educational exchange organizations for data on the international flow of students. Your contribution to this effort helps provide the basis for major policy decisions affecting foreign students in the United States and other aspects of international educational exchange. All respondents to the Census will receive a complimentary copy of Open Doors this month.

This year's ICDC request includes the STEP 3 Survey -- the biennial request for individual student data. This Survey is reported in the publication Profiles -- a copy of which was sent to you recently. As you have surely noted, the data in this publication provide a more detailed view of the foreign student and represent a valuable new resource to the field. We hope that you will contribute to the next Profiles by filling out the STEP 3 form. We would appreciate your filling out and returning the STEP 2 form by November 16, 1981, and the STEP 3 form by December 18, 1981. Completed forms should be mailed to:

Statistical Research Division
Institute of International Education
809 United Nations Plaza
New York NY 10017

Any questions regarding the survey may be addressed to Douglas Boyan at the above address or at (212) 863-8276.

AACRAO, IIE, and NAFSA are indebted to the thousands of Foreign Student Advisers, registrars, and other officials who have provided invaluable assistance in the conduct of the Annual Census in the past. We look forward to your continued cooperation.

Clifford S. Sjogren
President
American Association of
Collegiate Registrars and
Admissions Officers

Sincerely,

Wallace B. Edgerton
President
Institute of
International Education

Dixon C. Johnson
President
National Association for
Foreign Student Affairs

**INDIVIDUAL DATA SURVEY OF FOREIGN STUDENTS
1981/82****STEP 3****INDIVIDUAL DATA**

Page 1

STEP 3 INSTRUCTIONS

(Title/Office)		
(Reporting Official)		
(Institution)		
(City)	(State)	(Zip)

The attached label should include Title/Office, the Reporting Official, and the institution's name and address. Please make any necessary changes.

In STEP 3, the Interassociational Committee on Data Collection (ICDC) is asking institutions to provide **individual data** (without actually identifying student names) in order to allow much more detailed reports on the foreign student population in the United States. Only with **individual data** can reports be prepared indicating, for example, the number of female Nigerians studying nursing or the number of master's candidates studying biology from Japan. The last individual data survey, in 1979/80, has been reported in the publication *Profiles*—a copy of which was sent to you recently.

The collection of **individual data** is an enormous undertaking requiring the processing of hundreds of thousands of individual records (as opposed to some 2,800 institutional records in recent years). Its success is largely dependent on the care taken by each institution to provide that data in a manageable form.

If your institution cannot provide data for all the fields requested, you can still contribute significantly to the survey by providing as few as two of the requested fields, e.g. country of citizenship and field of study.

- INCLUDE ONLY NON-IMMIGRANT FOREIGN STUDENTS AT THE POST-SECONDARY LEVEL
- ALL INFORMATION SHOULD BE BASED ON THE FALL TERM, 1981
- DEADLINE FOR THE RETURN OF THIS FORM: DECEMBER 18, 1981

GUIDELINES FOR THE RELEASE OF INDIVIDUAL DATA

Reports based on individual data are available to individuals, agencies or corporations for clearly identified purposes of scholarly research, public information or recruitment for employment. Reports will be produced for recruitment purposes only when the employer has indicated that: the openings are for employment in the students' home countries or, in some instances, home regions; students' obligations to the sponsors of their U.S. study and/or to their own governments will be respected; the corporation or agency does not engage in discriminatory practices.

Student names obtained as a by-product of the census activity will not be released in any case without the student's prior consent.

The Institute of International Education (IIE) reserves the right to request that the proposed use of the data be documented and to withhold individual data when the request is not deemed to be for appropriate scholarly, public information or recruitment purposes.

INSTRUCTIONS CONTINUED ON PAGE 2

**INDIVIDUAL DATA SURVEY OF FOREIGN STUDENTS
1981/82****STEP 3****INDIVIDUAL DATA
Page 2****STEP 3 INSTRUCTIONS (Continued)****A. HOW TO REPORT INDIVIDUAL DATA**

1. The preferred format for reporting individual data is by filling out the form on Pages 3 and 4. If your institution has more foreign students than will fit on this form, please photocopy Page 4 as many times as necessary to include all students.
2. The preferred order for the individual data is to list students by country, within country by field of study, within field of study by academic level, etc. If you have two or more students with identical characteristics, then list them once and put their number in the first column as in the following illustration:

STEP 3 Individual Data		INDIVIDUAL DATA SURVEY OF FOREIGN STUDENTS—1981/82 Interassociational Committee on Data Collection (ICDC): AACRAO • IIE • NAFSA				PAGE 3			
NUMBER OF STUDENTS	COUNTRY OF CITIZENSHIP	FOR IIE USE ONLY	FIELD OF STUDY (Please be specific e.g. Electrical Engineering, Accounting, Dentistry, etc.)	FOR IIE USE ONLY	ACADEMIC LEVEL (See Code Below)	SEX (Male or Female)	AGE (in years)	DATE OF BIRTH (Month/Day/Year)	NUMBER OF DEPENDENTS INCLUDED FROM THIS U.S.
1	Germany		Finance		04	X	18	0	0
1	India		Electrical Engineering		05	X	17	9	1
3	Iran		Petroleum Engineering		05	X	17	9	0
1	Nigeria		Soil Physics		09	X	17	4	3

1	Mexico		Art Education		06	X	18	0	0
1	Brazil		Communications Theory		08	X	17	6	0
1	China (PRC)		Agricultural Mechanics		09	X	18	0	0

B. ALTERNATIVE MEANS TO REPORT DATA: ROSTER REPORTS/COMPUTER PRINTOUTS

If your institution has too many students to report on the supplied form, IIE will accept computer printouts, directories, or rosters of foreign students.

However, in order that we be able to manage this data, we strongly urge you to have those rosters produced in the format and order described in A (above). If you are unable to produce a report in precisely that order, a report grouping students by any other of the five characteristics will facilitate our data management task. Note:

- If the report contains codes or abbreviations, please include a key for decoding
- If the report includes students on immigrant visas (permanent residents) and they cannot be excluded, please identify them
- Please have any computer printout triple spaced, if possible, to allow room for coding by IIE
- If you send a report, please attach the label from page 1 of this form

If you or your data processing department have any questions regarding the provision of data in printouts or on computer tape, please contact Douglas Boyan at IIE (see below).

ANY QUESTIONS SHOULD BE DIRECTED TO: Douglas R. Boyan, Manager, Statistical Research, IIE, (212) 883-8276

STEP 3 SHOULD BE RETURNED BY DECEMBER 18, 1981 TO:

Statistical Research Division
Institute of International Education
809 United Nations Plaza
New York, NY 10017
